

High-performance light barrier

**for the most extreme applications
with gas and dust Ex approval**

Our new ILG-260 high-performance light barrier is used as an overflow protection in wood chip heating systems and has already proven itself many times over.

The ILG-260 high performance photoelectric switch offers maximum performance, safety and reliability thanks to its long range, very high penetration depth, user-friendly handling (plug & play) and alignment capability.

Easy alignment and customer-friendly handling make the new ILG-260 high performance light barrier with gas and dust Ex approval a „must have“ for the furnace industry!

Transmitter: ILG-260-ADZ-OP, Receiver: ILG-260-LEA-NO

Light used: infrared, 850nm, insensitive to ambient light

Use in Ex zones 1, 21 according to ATEX, IECEx

Range: up to at least 30m

Power supply: 24 VDC

Output: pnp

Design: M30 metal housing, protection class IP 67
