

# High-performance light barrier

## for the most extreme applications with very strong penetration

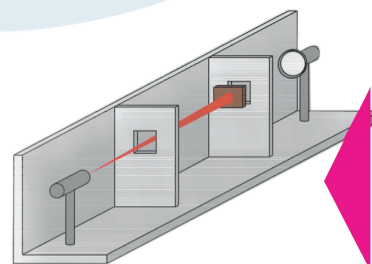

**Improved alignment and significantly reduced susceptibility to interference from ambient light make the ILS-260 high performance light barrier a must-have for the furnace industry!**

The powerful ILS-260 high performance light barrier from Tippkemper-Matrix is the perfect addition to your oven when it comes to "edge gap monitoring". It not only impresses with its sturdy metal housing, long range of up to 600 m and strong penetration, but also with its independence from dirt and ambient light across the board.

**>> Wherever strong penetration, dirt resistance, long reach and easy handling are required. <<**

**Exclusion of  
faulty switching  
due to flames!**

**Registration  
of falling  
objects!**
